

"THIS GENERATION"

A moving picture of particular interest to western agriculture, will be shown at

WHEAT POOL MEETINGS

to be held at the following places and dates:

Oyen — June 27 — 8:00 p. m.
Lanfne — " 28 — do
Cereal — " 29 — do
Chinook — " 30 — do

Also a comedy picture will be shown.

W. Pettinger, Alberta Wheat Pool field serviceman, will be in charge of the meeting

Local News

Mr. Murphy of Lethbridge, Dominion representative of the Rehabilitation Board was a guest at the Chinook Hotel on Tuesday.

Mr. A. M. Munrow, District Service Supervisor of the Alberta G. Telephones of Calgary, was a Chinook visitor on Wednesday.

Miss J. Morrison, nurse of Winnipeg, who has been with her many friends in this district left for Hanna on Tuesday where she will spend a week or two with friends.

Mr. Bradwick, Licence Inspector of Oyen, was a guest at the Chinook Hotel Tuesday

Wesley Gilbertson left Monday for Drumheller where he expects to get work for the Summer.

Miss A. Shier of Sibbald, was a Chinook visitor last Thursday.

Kitchen Shower Given For Bride-elect

A very pretty kitchen shower was given by Mrs. Leonard Cooley at her home in honor of Miss Cathleen Shier, whose marriage to Mr. Lyle Caspell will take place in July. Games were enjoyed by the twenty guests present.

A beautifully decorated basket of gifts topped with a miniature bride and groom was presented to the bride-elect. Miss Alice Shier assisted with the opening of the gifts.

Those who attended the U. F. A. Convention at Cereal last week were: Messrs O. D. Harrington, Lorne Proudfoot, R. Marr and L. Robinson.

There has been three good showers of rain in the Chinook district this week, one being almost a cloud-burst while it lasted. The growth of grass and gardens is just marvellous.

[Today] Thursday there is a slight improvement in the condition of Dr. Esler's health

BANNER HARDWARE AND GROCERIES

Mrs. N. Mysterom returned from Burbank last week after having spent a month with friends and relatives.

Two extra men have been added to the C. N. R. section gang in this district namely: Bill Dobos and Donald Ray.

Mr. H. Malcolm, former high school principal, and Mrs. Malcolm left on Thursday for their home at Innisfil.

Mr. C. E. Neff of Hanna, spent a few days in town this week. We are always pleased to see Mr. Neff.

Mr. D. E. Bell was an Oyen visitor on Saturday.

Julius Damsgard left this week for Rowley where he expects to get work.

Mr. P. R. Weber, local manager of G. A. F. Hanna, was a town visitor Wednesday.

The Ladies' Card Club

The Ladies Card Club met at the home of Mrs. Murrell on Tuesday evening. The occasion was a farewell party for Mrs. Youell and Mrs. Malcolm, who were each presented with lovely pyrex pie plates by Mrs. Pfeiffer on behalf of the Club. New officers were chosen, Mrs. Robinson, President, and Mrs. Lee, Secretary-Treasurer.

Honours at bridge were shared by Mrs. Morrell and Mrs. Todd.

After an enjoyable lunch was served the ladies departed and will not meet again till next fall when the Club plans to go on again.

Boer War Vet Dies

After Long Illness

Formerly a resident of the Cereal and Oyen districts where he farmed for 21 years, Harry Gibson, 64, died in a local hospital Saturday morning following a lengthy illness. He was born in Chester, England, and served with the King's Royal Rifles in the Boer War. He came to Canada in 1903 and moved to Calgary from Oyen five years ago.

He is survived by his wife, Bessie; one son, Harry; both of Calgary; one sister, Mrs. Elizabeth Litter, Chester, England; and one brother, Jack, Trail, B. C. Rev. E. L. I. Hughes conducted services at Jacques' funeral home today.

FARM WOMEN'S WEEK IN JULY AND AUGUST

Farm women will gather at the school of agriculture, Vermilion from July 5 to 8 inclusive to attend the 5th annual Farm Women's week at Olds August 1-4. The course is open to all women of Alberta and it is not necessary to attend for the four days.

There will be lectures on a variety of topics by the instructors in domestic science, sewing problems, diets, preservation of foods, home decoration etc. The instructor in horticulture will have several periods on the growing of vegetables, flowers and shrubs. These will be outdoor periods, the growing material on the school grounds forming the basis of the talks. There will be two evening sessions, with talks on literary and historical subjects. No fee for the classes will be charged.

Gold Where It's Found

"There's gold where you find it."

It's an adage familiar to prospectors who dare the loneliness of the wilds, the heat of the summer and the snow and ice of the winter in the hope of some day striking that elusive vein which shall put an end to their trials. It is not only current among prospectors, but the truth of its assertion has recently been perpetuated in movieland as the title to a popular film.

The adage gives point to many a saga of the hinterlands where men have grown grizzled and grey in a vain search for the precious metal and have finally lain down pick and shovel at life's end, their labors unrequited. One feels stirred to pity at such stories and is tempted to wonder if they might not have found a better reward if they had pursued some other venture, less romantic but more remunerative. Perhaps they might have done better had they observed and heeded the call of opportunities close at hand instead chasing the rainbow which led them far afield.

Other Opportunities

Similarly one may be led to speculate at times whether some of our governments are not passing up an opportunity which lies at their door to develop to its utmost, latent wealth which might perhaps be readily attainable, or developed to a much greater extent than it has been in recent years; whether or not some of the efforts which are being made to search for hidden riches in remote areas might not return steadily accumulating dividends of greater value in the long run if they were turned to the cultivation of prospects outside our back doors.

Specifically, reference is made to the tourist traffic from south of the international boundary line—a plum of great value that will soon be ripe for the picking if the field is cultivated with care and the product is nursed with an eye to encouragement of a greater yield at harvest time.

That there are great potentialities in this comparatively new found industry, and that it would respond readily if the necessary encouragement were given, there can be no doubt, when one reads of the growth it is making with the comparatively small effort that is being made to develop it. One finds, for instance, without any undue effort on the part of the people of this country and their representatives, that it is an industry that is growing rapidly and materially and one is inclined to wonder whether greater efforts would not bring astonishing results, and thus about time.

For instance, latest statistics, just to hand, reveal that the total estimated expenditures in Canada of tourists from other countries during 1937 amounted to approximately \$294,682,000 compared with \$251,299,000 in 1936, a gain in one year of \$43,383,000 and of this amount a total expenditure of \$277,710,000 is attributed by the Department of National Revenue at Ottawa to tourists from the United States.

A Growing Industry

The total for last year is not far short of the value of the Western wheat crop in an average normal year, though it is true that the bulk of the benefit is derived by Eastern Canada and British Columbia. Nevertheless, when this comparatively new-found gold mine yields an increase of approximately 15 per cent. in one year without any great effort being made to develop it, one is warranted in anticipating that more vigorous prosecution of effort would result in increasing production by leaps and bounds.

The figures amply demonstrate that the "ore" is available in much greater quantity and that Americans only need greater encouragement to visit this country in increasing numbers and thus assist in improving our revenues.

If Western Canada is to share to a greater extent in this potential source of wealth it is absolutely essential that more attention be given to the highways of the country. More lines are needed between the highways on both sides of the international boundary, and greater efforts should be made to improve and maintain in a high state of efficiency the highways already built.

While it is true that the Canadian west has much of interest to offer to tourists from the south, more could be done to add to the attractions. There is much land in the prairie countries which is not of sufficiently high quality to farm profitably and some of this land could be converted into parks, game preserves and beauty spots under a program of reforestation.

Publicity Needed

And when more good roads are available and more and wider areas are developed as parks and playgrounds, not only for visitors from the south but also for our own people, the necessity of making these attractions well known to prospective tourists by a well directed and co-ordinated publicity program should not be overlooked.

It is true that something has been done in this direction in the past but depression has impeded progress. Now, it appears, however, that the time is approaching when much more can and should be done and the value of such an undertaking will not be hampered one iota if much of the work is undertaken as an unemployment relief measure.

Titled Cleric

Canada's Only Titled Clergyman Leaves For England

Sir Francis Heathcote, Archdeacon of Vancouver, was bound for England, slightly confused over the turn of events that have made him Canada's only titled clergyman.

Leaving Montreal for Quebec, where he boarded the liner Empress of Australia for England, the tall, handsome cleric who came to Canada from England in the 80's, told reporters he had little or no information on his inheritance.

He said his succession to Sir Gilbert Heathcote was bewildering because he had been so far down the line.

"I'm the sixth son of a third son," he said, "and there was also a nephew in between, but they're all dead now."

Sir Francis has no church in Canada, the Vancouver archdeacon being an endowment of Lady Burdett-Coutts.

Home medicine cabinets have been invented with combination locks to prevent children opening them.

Battle With Bear

Boy Owes His Life To His Two Sisters And A Police Dog

A story comes from Pease, Sask., that Pete Herington, 14, owes his life to the bravery of his two sisters and to their large police dog. The lad, while hunting some cows, espied a young bear cub behind a log. He stooped over to pick it up only to be struck a terrific blow by the huge paw of the mother bear which had come up behind the lad. The blow was so heavy that the boy was knocked unconscious.

Pete's two sisters, Florence and Marion, witnessed the affair and without any thought of their own safety they, with their dog, rushed forward. The dog made straight for the bear, grabbing it by the throat, and there ensued a battle for life. Meanwhile the girls were able to drag their brother to safety amid the barking of the dog, the growls of the bear and the shrill cries of the cub. The dog eventually drove the bear into the bush.

Pete is proud not only of his sisters and the dog but also of the marks of battle on his neck and back, which he proudly exhibits.

Missed Mail

When a post office worker mistook the letters "P.Q." for "P.L." letters intended for delivery in Montreal were sent across the Pacific to the Philippine Islands. A considerable amount of mail addressed to the Province of Quebec has recently been returned by Manila.

Turku and Viborg, in Finland, are centres of the ant egg industry, exporting eggs from their farms to pet dealers and zoos throughout the world.

Thomas A. Edison's famed deafness came about when, as a boy, he ran after a moving train and a brakeman grabbed him by the ears to haul him to safety.

Big Fleet For Russia

Soviets Plan To Greatly Increase Naval Power

Plans intended to make Soviet Russia one of the great naval powers of the world are being pushed and should begin to bear fruit within the next four or five years.

Realizing a great maritime Russia is not possible without a powerful high seas fleet, Soviet leaders have already completed the initial technical work which will give the nation a huge four-arm fleet grouped on the Baltic, White and Black seas and the Pacific ocean.

Equipment is now ready by which the nation should be enabled to manufacture big calibre guns up to 15.75 inches together with powerful protective armament. Foreign technical help will be used in the early stages of the construction period. The last two modern cruisers built at Leningrad were constructed with the aid of Italian engineers.

SELECTED RECIPES

ORANGE CREAM

2½ cups milk
½ cup white sugar
4 tablespoons St. Lawrence or Durham Corn Starch
3 tablespoons orange juice
2 tablespoons lemon juice
1 tablespoon grated orange and lemon rind mixed
2 eggs separated
1 teaspoon salt

Add grated rinds to juices and allow to stand. Scald 1½ cups milk in double boiler. Add sugar and corn starch mixed with remaining cold milk. Stir constantly until thick. Cook 10 minutes stirring frequently. Add beaten egg yolks and salt. Cook 5 minutes. Add strained fruit juice and cool. Pour over cut up oranges sweetened to taste. Cover with meringue made of the stiffly beaten egg whites with 2 tablespoons fruit sugar. Brown slightly. Crushed pineapple is a nice addition to oranges.

No Infringement

Motion Picture Company Wins Appeal In Copyright Case

Use of a song title as the name of a motion picture does not constitute an infringement on that song's copyright, the Ontario Court of Appeal ruled.

Accordingly, it allowed the appeal of Twentieth Century Fox Corporation Limited against a judgment holding that company liable to Francis, Day and Hunter, song publishers, for \$1,046.35 for using the title, "The Man Who Broke the Bank at Monte Carlo," in a picture. Neither words nor music were used.

"The owner of the copyright suffered no wrong by what was done," said Mr. Justice Middleton, for the court. "The idea, if any, of the song, its words and its music were not taken."

Just What She Meant

After a church conference the hostesses met and talked about their visitors. Someone asked Mrs. Brown what visitors she had had.

"I had two locust preachers," was the reply.

"You mean locust preachers. Locusts are those things that eat up everything."

"That's right. I had two of them."

Ye Olde Cheshire Cheese, famous old London inn, never employs a waiter named William, out of respect for the memory of Old William, favorite waiter on 18th century literary greats.

A baby grand piano weighs about 450 pounds.

Foreign Spies

Try To Filch Secrets From U.S. Airplane Factories

Foreign spies, trying to filch secrets from American war plane factories, want to know how the United States means to operate planes of the future without propellers.

They would like to find out the extent of United States laboratory work in launching tomorrow's war planes, weighing several hundred thousand pounds, by catapult.

They risk their lives to steal the designs for aircraft bomb sights, which enable army and navy airmen to reach a target unerringly from an altitude of four miles.

When 18 persons were indicted on charges of espionage, it was learned from confidential sources, it marked only the beginning of a drive against more than one foreign spy ring.

Ramifications of the work of foreign secret intelligence agents, intensified by the international situation and the world rearmament race, are known only to picked government agents. Working with the army and navy, the justice treasury and other departments of the civil governments are protecting devices for national defence with which war planes may not be equipped for another five years.

Flies Like A Fly

Plane Designed By German Professor Has No Propeller

An international record was claimed for Professor Heinrich's "house fly" flying machine which flew 144 miles from Bremen to Rangsford, near Berlin.

The hell-copter, like a fly, can go forward, up, backward, sideways, down or stand still in the air.

The machine has rotating wings driven by an engine in the fuselage. It has no propeller, but uses a changing angle of incidence of the revolving wings for its sideward, backward and forward motion.

Expert At Mopping Up

Seven bank accounts, a \$100,000 flat building, \$10,000 worth of furniture and a summer home were listed in a New York divorce suit as among the properties held by a former official of the flat janitors' union. That gentleman certainly did a lot of mopping up with his mop, says the Toronto Star.

MAKE READY FOR HOLIDAYING

By Anne Adams

If you're one of those people always on the go, you'll vote Anne Adams' pattern 4789 the most useful outfit in your wardrobe. Together the three jacket pieces are ideal for golfing. With blouse and shorts, you're all set for tennis or the beach and both costumes can be varied with different sets of sash and kerchief. So simple to make! Just wait 'til you see how rapidly you can stitch up that neat "school girl" collar and handy pocket—that classically graceful skirt opening down the front for a good stride (and easy ironing)! Finish several sets—in different colors and tub fabrics!

Pattern 4789 is available in misses' and women's sizes 12, 14, 16, 18, 20, 32, 36, 38 and 40. Size 16 entire ensemble, taken 5½ yards 36 inch fabric and 1½ yards contrast. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg, Newswaper Union, 175 McDermott Ave. E., Winnipeg.

Radio Plays

Cash Prizes To Be Offered By Broadcasting Corporation

It is the intention of the Canadian Broadcasting Corporation to encourage Canadian authors to write popular Canadian radio drama suitable for broadcast purposes, dealing with Canadian manners, and to obtain this sort of material it will offer cash prizes.

This announcement was made by Major Gladstone Murray, general manager of the Canadian Broadcasting Corporation, in an address to the Canadian Authors' Association, on "What Radio Has To Offer the Writer." A semi-independent board of adjudicators would be set up to decide on the material selected.

Major Murray told the association it was essential that radio work be done well. The spoken essay was the most important part of broadcasting. In this connection he referred to a recent successful broadcast of a story by Miss Mary Weekes of Regina, "The Last Buffalo Hunt," which was an example of the desired type of material. He also praised the talents of Bruce Hutchison over CBO.

Quality of good radio writing should be its directness, simplicity and good use of Anglo-Saxon synonyms.

Sound of the language in a story broadcast was also a most important feature. Centre of the problem of radio broadcasts was the drama and the most successful so far had been adaptations of stage plays and novels. There had been some writing done purely for the radio, in Canada, but it had not been of very high quality. There was a great and rich field for writing for the radio, dealing entirely with Canadian contemporary manners and the interpretation of one section of Canada to another section.

"I place art always in the foreground," said Major Murray. Canada should not be an imitator of foreign methods of broadcasting.

Rupert Caplan, of the Canadian Broadcasting Company, Montreal, and well known producer of plays, said the opportunity offered to write good radio plays had not been taken up seriously by leading Canadian writers.

Mr. Caplan said the radio listener to-day wanted to be entertained, more than educated. Canadian radio authorities were searching for good radio material, could not find enough of it. "It is not necessary to go up in the attic for it," he said. "It is all around you, in the home, on the street, in your every day life."

The Centre Of Unity

Throne Blinds British Empire To Greater States Last Tuesday

Without the unifying power of the crown, none of the other ties which hold together the free, autonomous nations of the British empire would "bind for long," Lord Tweedmouth said in an address at Bishop's college convocation in Lenoxyville, Que.

"The throne is the centre of empire unity," the governor-general told the gathering at graduation exercises.

"What is there in common between peoples who represent every race-stock on earth?" he asked. "Yet these differences are differences within the unity. The throne binds the whole empire together and gives cohesion to a vast growth whose ultimate destiny is unpredictable. There are other binding influences, such as the bonds of sentiment and blood and of tradition, but without the unifying power of the crown none of these would bind for long."

"To millions of dark-skinned peoples in Asia and Africa and the isles of the sea, government means the person of the sovereign."

The importance of the British monarch is not in "what he does but in what he is," said the governor-general. "We are a democracy in which the will of the people prevails by means of their elected representatives. But the king represents the people in a deeper sense—abiding continuity of the nation behind all the mutations and vicissitudes of parties."

"Britain has rebelled quite often against kings. But never against kingship."

Really Seeing The Country

Chance Comes With Necessity For Driving New Car Slowly

A friend of ours who bought a new car the other day is having an enjoyable experience, states the St. Mary's Journal-Argus. For the first few hundred miles he is driving the car at 20-mile rate. And he says he is really getting acquainted with the countryside as he tours about. He sees what is going on about him up and down the concessions and he observes the progress of spring growth. It makes an interesting and informing picture.

BEE HIVE Syrup

is the ideal sweetener on your morning cereal because it is easier to digest.

TRY IT TOMORROW

On Its Way Out

Straw Hat As Summer Headgear For Men Sees Doom

It used to be possible to date the beginning of summer by the burgeoning of straw hats. Some fine Monday morning the usual sober grays, blues and blacks would change. The straw hat, after all, had disappeared, and one swam along a city street in an undulating swell of flat-topped straws, with here and there a panama drifting like kelp in the tide. In the afternoon, between 5 and 6 o'clock, there would be a heavy thunder shower. As the sun's rays came back, the hats grew dingier. Buttercups and goldenrod adorned the meadows, a few leaves were seen to have turned, and hat owners wondered if another cleaning would be necessary before the winds of autumn brought down the first premonitory flutter of fells and doxies. This year, however, fells have remained firm, and in some cases active, while straws have been sluggish.

Without taking sides in any controversy that may be brewing between the felt hat and the straw hat, one may regret the loss of the straw hat, after all, demanded only a brief three months of life. It was not pretentious. The flat-topped sailor type gladdened many a sad heart when it blew off somebody else's head and went trundling down the street. It made a trinket of commuters all look alike, but their wives were generally able to get them sorted out. Is the straw hat doomed? Let us hope not.—New York Times.

Should Use Better Seed

Records Would Indicate Average Farmer Now Indifferent Quality

Canadian farmers should take fuller advantage of the country's remarkable facilities for use of certified wheat seed, Dr. G. S. H. Barton, federal deputy minister of agriculture, told the Canadian Seed Growers' Association at Guelph, Ont.

From 10 bushels of certified seed there can be produced in five years 7,500,000 bushels of certified seed, the official said. Yet much potential registered and certified seed is being sold on the market.

Requirements in wheat, oats, barley, rye, peas, beans and buckwheat approximate 70,000,000 bushels annually. Of the 70,000,000 bushels, only one per cent. of registered seed grain and less than three per cent. of certified seed grain were available this year.

"Seed drill surveys, crop testing records and other sources of information indicate that the average farmer sows indifferent quality and mostly non-descript grain," Dr. Barton said.

A Hand-Printed Bible

Sweden Has Completed Work It Started Seven Years Ago

After seven years' work, Gustaf Wonnlund, a draughtsman employed by the Swedish railway company, has completed his own Bible having drawn each of the 4,000,000 letters by hand. He started work on February 12, 1931. Each of the 1,612 pages took him between two and a half and three hours. Stockholm reports he has insured it for \$5,000.

Will Continue Giving

Lord Nuffield, British philanthropist, in accepting a degree from the University of Sydney, Australia, said "I promise to continue to do everything possible for the suffering and deformed."

Walt Disney has purchased the rights of "Alice in Wonderland" for a film cartoon, according to the London Daily Telegraph.

Bamboo plants may grow as much as three feet in 24 hours.

RICHARD CONNELL
By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER XIV.—Continued

Crump came in.
"Beg pardon, m'lad," he said, "but Captain Duff-Hooper sent his man over to say that he is riding at ten and will be pleased to have you join him."

"Ask him to tell Captain Duff-Hooper that I'm sorry but I shan't be able to ride with him," said Rosa.
"Very good, m'lad,"
"And Crump, we're saved."

"Saved, m'lad?"

"The castle and everything. Mr. Bingley has come to our rescue."

"May I express my gratitude, sir?" said Crump. "And I think you'll be interested to know that Elaine is in excellent working order, except that she squeaks a bit when she wags."

"Oh her springs," said Ernest.

"I was about to do so," said Crump, and faded from the room.

In the kitchen Crump found Slat jackdawsically polishing a silver fish-slice and whistling "Happy Days are Here Again."

"Less music and more elbow-grease, if you please," said the butler.

"But happy days are here again, Mr. Crump," said Slat. "To-day we see the last of that loopy Yankee."

"I was not aware that Mr. Bingley intends to leave us to-day," said Crump.

"Well, I saw him packing his things, such as they are. Is he going to shoot the moon, do you think?"

"If, by that vulgar expression, you imply that Mr. Bingley is going to steal away without paying his rent," Crump said, frostily, "you are doing a grave injustice to a most honorable gentleman."

"Well, he's going, and that's something," said Slat. "Wonder what he'll tip. Good riddance, I say. Happy days are here—"

Slat rose three inches from the floor on the top of Crump's toe.

"And if you'd like another dose of the same, young Slat," Crump said, "just let me hear you pass any more remarks about Mr. Ernest Bingley."

In the breakfast room the earl was demolishing his third dish of codded eggs.

"Rather dressy this a.m.," he remarked. He could not have meant himself.

"Oh, I dressed up for your birthday," Ernest said.

"Did you also pack your bag for my birthday?" asked the earl. "I fell over it in the hall."

"My month is up, you know, sir."

"Don't be a gum-drog," said the earl. "Stay with us as long as you like as our guest."

"Thank you, sir, but I just can't," said Ernest. "I'd like to, though, very, very much."

"Name just one good reason why you won't stay on and at least spend Christmas with us."

"Business,"

"Business be blowed," said the earl. "Your people can take care of it. You can keep in touch with them by phone—if I have a telephone. Tell you what—I'll have one put in."

"I'm terribly sorry," said Ernest, "but there is a matter which needs my personal attention. I must leave for New York at once."

"You'll be back, of course."

"Some day, I hope."

"Soon?"

"Not very soon, I'm afraid," said Ernest.

"You'll always be welcome at Bingley Castle, Ernest, old chum," said the earl.

"Thank you."

"Well, if you must go, you must go, I expect," said the earl. "When do you sail?"

"On the first boat I can get out of London."

"I'll miss you," the earl said.

"Won't you, Rosa?"

"Yes," she said, her eyes on her eggs.

"You must keep in touch with us, Ernest," said the earl.

"Yes, sir."

"I collect souvenir post-cards, you know."

"I'll send you some."

"With Indians on them?"

"Yes, sir, with Indians on them."

"That's jolly good of you, Ernest. You must not forget us," the earl said.

"I'll never forget—Bingley Castle," Ernest said.

"I'll send you some."

"With Indians on them?"

"Yes, sir, with Indians on them."

"That's jolly good of you, Ernest. You must not forget us," the earl said.

"I'll never forget—Bingley Castle," Ernest said.

"I'll send you some."

"With Indians on them?"

"Yes, sir, with Indians on them."

"That's jolly good of you, Ernest. You must not forget us," the earl said.

"I'll never forget—Bingley Castle," Ernest said.

"I'll send you some."

"With Indians on them?"

"Yes, sir, with Indians on them."

"That's jolly good of you, Ernest. You must not forget us," the earl said.

"I'll never forget—Bingley Castle," Ernest said.

"I'll send you some."

"With Indians on them?"

"Yes, sir, with Indians on them."

"That's jolly good of you, Ernest. You must not forget us," the earl said.

"I'll never forget—Bingley Castle," Ernest said.

"I'll send you some."

"With Indians on them?"

"Yes, sir, with Indians on them."

"Let's stop talking about me," said Rosa.

"You must start soon if you're to catch your train. What can be keeping Father?"

"Where is he?"

"Said he had to go to his study to get something."

"What?"

"A parting gift, perhaps," said Rosa.

"I say, Ernest, you must have a picture of Mother Castle with you. I'd be most interested to see it."

"I haven't—I mean—well, I've a sort of picture," said Ernest.

"Please let me see it."

"All right."

He took from his suit-case the old miniature of Lucy Bingley.

"She's charming!" exclaimed Lady Rosa. "And she does look a little like me. Prettier, though."

"She is not."

"Why, Ernest! Is that any way for a bridegroom to talk?"

"It's the truth," he said.

"Never tell Rowena that," advised Rosa. "Why is she in fancy dress costume?"

"Amateur theatricals."

The Earl of Bingley came hurrying toward them, bearing a large package. He presented it to Ernest.

"I want you to have this as a memento of your visit and as a very slight token of my great esteem," he said. "It is not diamonds. I wish it were."

"Thank you very much, sir," said Ernest.

Outside the door there was a sound like a riveting center in a tunnel.

"I think I hear our car," said the earl. "So does most of Somersetshire, I expect. I say, Ernest, what's that picture?"

"His fiancée," Rosa told the earl. "Really? Mind if I have a peek?"

He took the miniature of Lucy Bingley from Ernest's hand.

"Jove, she's lovely," he said. He stared hard at Lucy Bingley's comely face. "I could swear I've met her some place. Who is she?"

"Rowena Castle of Chicago," said Ernest. "And you could hardly have met her, sir. She's never been abroad."

The earl wagged his head over the picture.

"I met her twin sister then," he said.

"She has no twin sister."

"Wish she had," said the earl. He handed the miniature to Ernest who stowed it in his bag.

Slat opened the front door.

"The car is here, m'lad," he announced.

"I thought it wasn't woodpeckers I heard," said the earl. He held out his hand to Ernest.

(To Be Continued)

Reliable Coin Testers

Counterfeit Currency Is Quickly Detected By Apes In Siam

As protection against the wave of counterfeit coins in Siam, merchants of Bangkok and other cities have installed large apes as coin testers.

Every coin received is given to the ape, which puts it in its mouth. If it is good, the animal drops it into a receptacle behind him. If it is bad he throws it on the floor, chattering loudly. How they know the difference is a mystery, but they are said always to be right.

A Timely Warning

Cold Desserts Or Drinks After Hearty Meal Are Dangerous

Dr. Harry M. Eberhard told members of the American Institute of Homeopathy at Philadelphia, that many deaths from "acute indigestion" were caused by heart attacks brought on by cold desserts or drinks after a hearty meal. Chilling the stomach stops the flow of digestive juices for about half an hour, Dr. Eberhard said. Then they start flowing at an excessive rate to make up for lost time.

Saved Prize Sheep

Mixture Of Whiskey And Milk Prevented Death From Exposure

Whiskey mixed with milk saved prize stud sheep from death on the Chatsworth House ranch, Australia, recently. In an effort to save valuable flocks from death by exposure during heavy rains and floods, the ranch owners bought up gallons of whiskey and milk. A solution of the two was injected into each member of the valuable flock, and not one died of exposure.

British Tommy: "Yes, on Christmas Eve, 1917, my regiment was in Jerusalem."

MacTavish: "Aye, an' I guess th' shepherds watched their flocks that night, all right."

A new kind of paint made in Germany is said to be fireproofed by having nitrogen salts and synthetic resin mixed in it.

If only we could tell when the future was beginning!

FLIN FLON

"The Story of Its Finding and Position To-day"

By PRATT KUHN

TOM CREIGHTON

The man who discovered the Flin Flon Mine in 1915.

Just the other day we read again of Tom Creighton, the prospector who found Flin Flon.

He is now in charge of field crews for Hudson Bay Mining & Smelting Co. properties, and so is again actively in the prospecting game which he loves.

To our mind came the story we heard from Tom's lips one night in Flin Flon—the story of how he regained his health after four years' suffering from the crippling pains of arthritis.

To-day he is 64 and as active as a 35-year-old, lean, sinewy, hard muscled, and without a pain imagine that, after he was all twisted up in his toes, wrists and fingers, back, elbows and shoulders.

When Tom was twenty he fell 18 feet down an open hatchway and hurt his back, which went against him when arthritis struck.

Anyhow, when prospecting, he weighed 165 to 168 striped, and is now 144—his feeling being that a natural weight attained at 21 years of age as possible.

Tom searched everywhere with all kinds of specialists for an arthritis cure, and then heard of a Dr. Elden in Denver, Colorado, who used natural methods. He went there in April, 1906, and between fasting, exercise, changing of the blood stream from acid to alkali, he spent six months, but came away like a new man, with a healthy body and only a little pain in one finger left.

I've watched Tom eating, and here's what his meals consist of:

Breakfast—Two or three Shredded Wheat Biscuits eaten dry, or with a little butter, chewed thoroughly and moistened through the natural saliva action. After that (and not with the Shredded Wheat) a good bowl of unsweetened fruit or a good helping of raw fruit.

Dinner—A dish of soup and a fresh vegetable salad.

Supper—Meat salad, fresh vegetables and two cooked vegetables.

Notice anything strange about this diet?

Well, there's no tea, coffee, milk, water or liquor on it, and Tom drinks only one half glass of water a day—in the morning, just half an hour before breakfast—never drinking with meals. Says he's never thirsty either. Another thing, he never eats starches and proteins at the same meal.

Perhaps you'll laugh at a prospector who paddles canoes, scrambles over rocks, does hard physical labor, taking exercise to keep healthy, but Tom does some special stunts like taming the stomach and rotating the skin one hundred times with a hand on each side of the colon.

He never felt better in his life, and while he was using glasses for reading before his treatment his eyesight had improved so much that the glasses are unnecessary now.

Just thought some of our readers might care to profit by the health hints given by Tom who spent years of time and thousands of dollars to find out just how to live properly, and it was so simple that anyone who follows this regime will certainly improve in health and strength.

Most of us dig our own graves with our teeth, through eating too much.

Wonder how Tom feels now? (I haven't seen him for a year) in charge of prospecting for Hudson Bay Mining & Smelting Co., who own Flin Flon, the mine he found twenty years ago and which in 1937 produced:

Copper 57,688,485 lbs.

Zinc 68,972,224 "

Cadmium 308,776 "

Selenium 74,298 "

Tellurium 7,884 "

and of the precious metals

Gold 133,605 ounces

Silver 1,633,378 "

and remember that while there were 1,647,438 tons of ore mined from Flin Flon last year, there are at

present reserves blocked out for 15 years more continuous operation.

To-day there is no relief, no talk of depressions and hard times in Flin Flon, Manitoba—the busy little city of 8,000 named after the mine; and pay checks amount to about \$280,000 monthly.

Because the civic authorities insist that everyone must be self-supporting, don't rush to Flin Flon unless you have money enough to get back. The city authorities are a little hard-balled about doing out relief, because they feel that everyone should be self-supporting.

And that's the final end of our Flin Flon story—for the present at least—though we may give you another picture later on because the subject is so interesting and so important to the people who live in the West, particularly in Manitoba and Saskatchewan.

Student Of Plant Life

Jack Miner Spends Much Time Cultivating Flowers And Trees

Far better known for his championing of the principles of wild life conservation, Jack Miner is nevertheless a keen student of tree and plant life. Proof of this is seen at his bird sanctuary in Kingsville, where the roadside leading to his estate is lined with literally thousands of gorgeous blooms.

Yes, the naturalist has spent nearly as much time on trees and flowers as he has on his feathered visitors. Perhaps one of the choicest iris beds in North America may be seen at his home, grown through the years from bulbs donated by an admirer of the naturalist.

Few gardens on the continent are made up of flowers gathered from such a wide range of climate and territory. Practically every state of the Union and every Canadian province is represented.

And this floral beauty is in no way commercialized. Many a sick friend has enjoyed a magnificent bouquet of breathing-taking beauty, hardly realizing that the finest blooms in North America were his.

The naturalist has clear-cut views on flowers as gifts. Give flowers to the living, not neglect them for the dead he counsels. At a recent birthday celebration, Jack Miner told reporters he would have no desire to live, but for children, flowers, birds and music. And he meant it.—By Lance Connery.

Originator Of Idea

King Edward VII. Suggested Private Bath For Hotel Rooms

The late King Edward VII. was originator of the idea of every hotel room being equipped with private bath. Charles C. Ritz told reporters As Prince of Wales the king visited Paris frequently and stayed at the Bristol hotel. A bathtub was brought through the streets and carried to the royal chamber when the prince wanted a bath. The prince suggested to Cesar Ritz that a hotel with bath in every room "would be a paying proposition," and the idea was carried out when the Paris Ritz was opened in 1888.

Secret Of Good Advertising

Is Putting Interesting Facts Into Words That Will Attract Readers

"Good advertising, like good thinking and good talk, feeds on facts," says Mrs. Bernice Fitz-Gibbon, publicity director for the John Wanamaker store. "The good ad is where you feel the writer knows all but hasn't time to get everything in; not a dull, long catalogue listing, but a few vivid facts plus one startling esoteric bit that convinces the reader that if the writer knows that, he knows all that can be known."

A step in the same direction is where you feel the writer knows all but hasn't time to get everything in; not a dull, long catalogue listing, but a few vivid facts plus one startling esoteric bit that convinces the reader that if the writer knows that, he knows all that can be known."

For Your Preserving

Use It This Year

New Operation Method

Puts Patients Back Into Circulation Without Loss Of Time

A method by which a Roumanian physician puts his patients on their feet almost from the operating table was described in the Journal of the American Medical Association.

"This new method is of inestimable advantage in time of war," the Journal's Bucharest correspondent reported on the work of Dr. Campeanu, lecturer at the University of Bucharest.

The evacuation of war hospitals thus becomes simplified. By shortening the stay of patients in the hospital, the surgical section of Campeanu's clinic in Brasov were able, with the same number of beds, to accommodate 500 more patients than in the previous year.

The articles said in the period from 1934 to 1938, 3,150 patients left their beds the day following the operation without experiencing any disadvantage.

The article said: "An assistant of Campeanu whose appendix had been removed, after having stepped down from the operating table, forthwith acted as assistant at the next operation and afterwards walked about. His recovery was prompt."

Come and bring your friends
in worshipRev. Mr. Whaley
YoungstownEquality of Market Seen
In Pro-Rating Plan

In contrast with experiences of other
new oil fields, producers in the Turner
Valley have at all times enjoyed a
good market at fair prices for their
production. Of course the price has
reduced somewhat when it became
necessary to expand the market for
Turner Valley crude. This had to be
done to cover the additional carrying
charges entailed by moving the oil fur-
ther afield. Pipe lines, railways and
refiners shared the reduction with
the producers. The consumer benefited
by substantially lower prices for prod-
ucts.

It was inevitable that the refiner
could not immediately buy all the oil
the Turner Valley could produce. As
purchases were restricted to the needs
of the market, but at all times, every
producer could secure his fair share of
the market at a fair price.

Contrast this condition with Mani-
toba where, according to F. G. Gault,
Chief Auditor of the Alberta Board of
Public Utilities Commissioners, who
studied the situation in that state,
some wells were operating at capacity
and others were completely shut in
because they had no market. This re-
sulted in unstable conditions making
it possible to buy crude oil at prices
much lower than are being paid to
the Canadian producer.

No such situation was allowed to de-
velop in Alberta.

FAREWELL
PARTY HELD

A farewell party was held
on Wednesday evening, June
29 in the Chinook Hotel Ball-
room, in honor of Mr. and Mrs.
A. V. Youell and family, also
Miss Alice Levick, who left
for Alaska on Thursday, where
Mr. Youell will be C. N. R.
agent.

The evening was spent in
dancing. Prizes were awarded
for some of the novel dances
which proved quite amusing
to onlookers and dancers alike.

After lunch the master of
ceremonies, Mr. W. Gallagher,
on behalf of the young people
of the district, gave a farewell
speech to Leonard Youell and
Alice Levick, which was re-
sponded to by Leonard Mr.
Lloyd Robinson then present-
ed Mr. and Mrs. Youell with a
gift from Chinook friends. Mr.
Youell expressed the regret of
himself and his wife at leaving
their many friends acquired dur-
ing their nine years of residence
here. Mr. W. A. Todd ably ex-
pressed the feeling of the gather-
ing in a short speech.

Mr. Youell has been in Chinook
for the past nine years. He and
his family have always taken an
interest in church work, and he
and son Leonard will be much
missed in musical circles as they
were always ready and willing to
contribute.

Experimental Station
Gives Hints on Problem
of Summer-FallowingRed Weeder Will Operate Most
Satisfactorily—Best Implement
to Use

Many fallows are now being cultivated
at this time of the year for the
second time, and some may require a
third cultivation before the first of
August. The question is frequently
asked, "what type of cultivation is
best for the second and subsequent
cultivations?" This depends on the
condition of the soil, the presence and
amount of weeds, the amount of trash
on the surface, and the previous tillage
the field has received.

In general, it may be said that if
the red weeder will operate satisfac-
torily, it is the best implement to use.
The draft is lighter than that of other
cultivating implements, and if it penet-
rates the soil successfully it usually
destroys all of the weeds. It is well to
keep in mind that if the red weeder
is used, it should be run deeply en-
ough to get under the trash of a
straggly fallow, or under the clods
of a plowed fallow. If it is run near
the surface it will tend to bury the
trash or trash the trash down so that
it will smother and slow operation. A
plowed field makes the red weeder
a clod buster.

The duck-foot cultivator or the blade
weeder is safer to use than the one-
way where soil conditions prevent the
use of the red weeder. Either of these
implements must be run deeply en-
ough to get beneath the root crown
of the stubble if much trash is present.
Blade weeders have a less tendency
than the duck-foot to bury trash, and
if the soil is dry they will operate
where a great deal of trash is present
and give a satisfactory weed kill.

The one-way disc is a good weeding
implement but it covers trash, and so
is a dangerous implement to use for
summer cultivation, as it is likely to
cover the soil in a driftier condition.
Generally it should be used only where
a red weeder or duck-foot will not do
the job.

Unfortunately, some farmers do not
have these implements and are de-
pendent on a disc as their cultivating
tool. The disc is a poor weeding im-
plement as it seldom gives a complete
kill, and so frequent cultivations are
required to keep down weed growth.
As the disc pulverizes the soil and cov-
ers the trash this implement usually
leaves the soil in a condition to drift
with the first wind.

"But I am an incurable optimist
I think that things are getting better
slowly. I think that all progress means
change, but not that all change means
progress."—Rt. Hon. R. B. Bennett.

Capital invested in hydro electric
plants in Canada has doubled in the
past ten years.

NEED SPEEDER AND
AIRPLANE TO
AID DOCTOR

Hero of a dozen country
dramas of life and death, Dr.
John Esler of Cereal lies
gravely ill in hospital there,
although Dr. Robert O'Cal-
laghan of Calgary stated he
believed the well known coun-
try doctor was "holding his
own."

Dr. Esler was stricken with
pneumonia last Friday on his
return from attending an in-
jured 12-year-old school boy,
Jack Duffy, of Lonely Trail,
30 miles distant from Cereal,
bringing the unconscious lad
home with him, the doctor was
so ill himself he was unable to
set the young patient's arm.
Dr. A. K. MacNeill of Em-
press was called in to attend
the boy, who is now progress-
ing satisfactorily in the Em-
press hospital.

Monday Dr. McNeill was
again in Cereal, with Dr. Esler
as his patient, and Dr. O'Cal-
laghan was called from Cal-
gary as consulting physician.

Dr. McNeill flew in by plane,
recent rains have made coun-
try roads impassible in the
district, while Dr. O'Callaghan
made the 120-Mile trip from
Hanna by C. N. R. speeder,
secured for his use by Dr. W.
W. Cross minister of health.

People of the Cereal and
Chinook districts look on the
illness of their doctor as a
calamity. He has served the
district for a score of years, in
all sorts of weather, and in the
face of seemingly insurmount-
able difficulties.

SARLE PRECIPITA-
TION REPORT NO. 4.

RESEARCH DEPARTMENT

(Compiled from 182 Rain
Gauge Reports).

Combining the precipitation
that occurred last autumn
during the months of August,
September and October, and
the rains which have fallen
this year from April 1st to
June 18th, inclusive, and
weighting for wheat acreage,
the moisture condition in
Alberta on June 18th was 92
per cent of normal as com-
pared with 97 per cent for the
previous week, and 98 per
cent for the week before that.

For Saskatchewan, on June
18th, the condition was 86 per
cent as compared with 89 per
cent for the previous week,
and 98 per cent for the week
before that.

For Manitoba, on June 18th
the condition was 84 per cent
as compared with 87 for the
previous week, and 86 per
cent for the week before that.

Taking the three prairie
provinces as a unit, the weight-
ed average on June 18th, was
88 per cent of normal, as com-
pared with 90 per cent at the
same time last week, and 89
for the week before that.

The use of moisture by the
young plant up to this stage
of its growth is comparatively
small. From now, on how-
ever, the moisture utilization
increases rapidly. Due to
this fact, therefore, the impor-
tance of the moisture situation
is accentuated at this time.

(Searle Grain Company, Ltd.)

BUYING WISFLY

The ever increasing popularity and
wide acceptance of ALBERTA BEERS
is the result of critical consideration
of merit preceding the purchase of
products . . . in other words —
"BUYING WISELY." People know
from personal experience that Al-
berta's five brands are the finest beer
that modern methods can produce.

They know that in its manufacture
only the choicest hops and malt are
used. They know the utmost care and
skill is exercised in their control.
Then, too, ALBERTA BEERS are
thoroughly aged. MAKE YOUR
NEXT ORDER ALBERTA BEER.
